During the work experience of 30 years of my special engagement was an affirmation of herbs in the prevention and treatment. It is believed that the plant flora of Montenegro represented over 3200 species of which about 400 medicinal and about 50 endemic, which ranks first in Europe in terms of number of species per unit area. We're supposed to be among the first in the use of herbal remedies primarily in prevention and treatment. I especially emphasize involvement in the education of citizens on the application of herbs and other natural products through educational TV programs and magazines, lectures...

- In cooperation with the TV CG we have done over 50 TV shows, processed and presented to the public about 70 species of wild medicinal Montenegrin flora

- I presented many of the approximately 20 direct TV and radio shows, around 15 public lectures organized by various associations, written over 50 articles in popular magazines in order to promote the healing of goods Montenegrin flora.

2009/2010 school I was hired as an associate in exercises in the program of study Pharmacy in Podgorica on the subject of Pharmacognosy I and II.
